## ■ Introduction:

Henan Province Xinchang Copper Co.,Ltd is situated in the capital of Henan province, in Industrial Park, Gongyi.

Henan Province Xinchang Copper Co.,Ltd is the earliest private enterprise in Henan(China) cable business. Our cables are manufactured using the most up-to-date technology. Modern production facilities are backed by a highly qualified work force and experienced engineers, who ensure that only cable of the highest quality leaves our factories.

Henan Xinchang Import and Export Trade Co., Ltd, and Shanghai Kaiseder International Trading Co., Ltd. are our wholly-own subsidiaries in charge of our import and export.

Through them we have exported to North America, South America, Caribbean countries, Southeast Asia, Middle East, and Africa.

- **Our customers will receive superior value**
- **Our shareholders will receive ever exceeding returns on their investments**
- **Our business partners will share our success**
- **Our employees will prosper**

Our product range includes general building wires, data and telecommunications cables, industrial rubber cables, overhead conductors together with power cables up to, and including, 35KV.

We constantly get updates and feedbacks on their stated / implied needs and problems. Based on this information we have devised new modalities to provide better service to our valued customers. Thus we not only provide Quality Products but also offer a host of related services before and after the sale.

Cables are manufactured strictly in accordance with the appropriate GB (China) Standard Specifications and to IEC, CE and UL standards and are approved by the relevant Classifications Institutions. Full traceability is maintained by strict adherence to quality policies compliant with ISO9001/2, whilst environmental policies will be maintained by compliance with ISO14001 in no time.

## ■ **Products:**

Medium Voltage Power Cables up to 19/33(36) KV

Low Voltage Power Cables up to 600/1000V

Control Cables 600/1000V

Bare Conductors for Overhead Lines

Earthing Conductors

PVC or XLPE Insulated Conductors

Domestic Applications / Internal Wiring

LSFH Cables & Wires

Enamelled Wires

Telephone, communication & Instrumentation Cables

## ■ Quality:

Quality has always been our top priority and to meet customer's expectation has been our prime objective; the very basis on which we earned the confidence of our clientele. It is this concern and commitment rather than just sell of product, has given us a distinct image and competitive advantage.

**ISO9001:2008 CERTIFIED BY RWTUV GERMANY**

**ISO 9001:2008 CERTIFIED BY SGS**

**ISO 14001:2009**

**BASIC RANGE OF CERTIFICATES**

We at HNXC always aim for the best. While most of the Cable manufacturers in China, we stand out with ISO 9001 which recognizes our ability for Design & Development as well.

As a philosophy our commitment to Customers does not end with a sale. We also offer a host of related services before and after the sale. These include,

- Application engineering service for selection of appropriate product best suiting the end use.
- An extensive range of cables single core wires flexible cords bare & insulated conductors manufactured to stringent Quality standards going beyond international specifications.
- Design and Development of products tailored to meet specific requirements of the application.
- To help the customers understand the product intricacies and its performance levels.

### Note 1:

The tabulations on subsequent pages furnish overall dimensions, net & gross weights and drum dimensions. Please note that these are "approximate" values. They have been furnished for general guidelines and intended to be used for thumb rule estimations/freight calculations.

### Note 2:

Voltage Rating:

Two distinct systems of voltage designation are generally in use. Equivalence between these two systems. Based on insulation thickness and maximum value of highest system voltage is as tabulated below:

IEC Designation $U_0/ U (U_m)$	BS Designation $U_0/ U (U_m)$
3.6/6 (7.2)kV	3.8/6.6 (7.2)kV
6/10(12)kV	6.35/11(12)kV
8.7/15(17.5)kV	8.7/15(17.5)kV
12/20 (24)kV	12.7/22 (24)kV
18/30(36)kV	19/33(36)kV

## WHERE

- $U_0$  is rated power frequency voltage between conductor and earth metallic screen, for which the cable is designed.
  - $U$  is the rated power frequency voltage between conductors, for which the cable is designed.
  - $U_m$  is the maximum value of “highest system voltage” for which the equipment may be used.
- From above tabulation, equivalent IEC/BS designation can be determined for any system as appropriate.

### Note 3:

The following list tabulates only the “standard” products. For any product not listed below, please do not hesitate to contact our sales & marketing division. We shall be too pleased to meet your specific requirements.

#### Product Standard

Medium Voltage Power Cables up to 30kV

- XLPE insulated, single core or multi-core armored IEC 60502/BS 6622

#### Auxiliary Cables

- 16 core or 34 core pilot cables to be used along with MEW/ESI Standards
- Underground power lines 11kV, 132kV and beyond

All conductors circular solid (Class 1).

In 16 core Pilot Cable polyester laminated aluminium screen is provided over pairs for Solkor protection and Telephone System.

In 34 core Pilot Cable individual pairs for Solkor protection system and inter tripping and Interlocking system are screened with plain copper tape. Also an overall screen of plain copper tape is provided over PE bedding.

Cables conform to MEW Kuwait and ESI 09-6 specification.

## Short Circuit Curves for Copper Conductor XLPE Insulated Cables

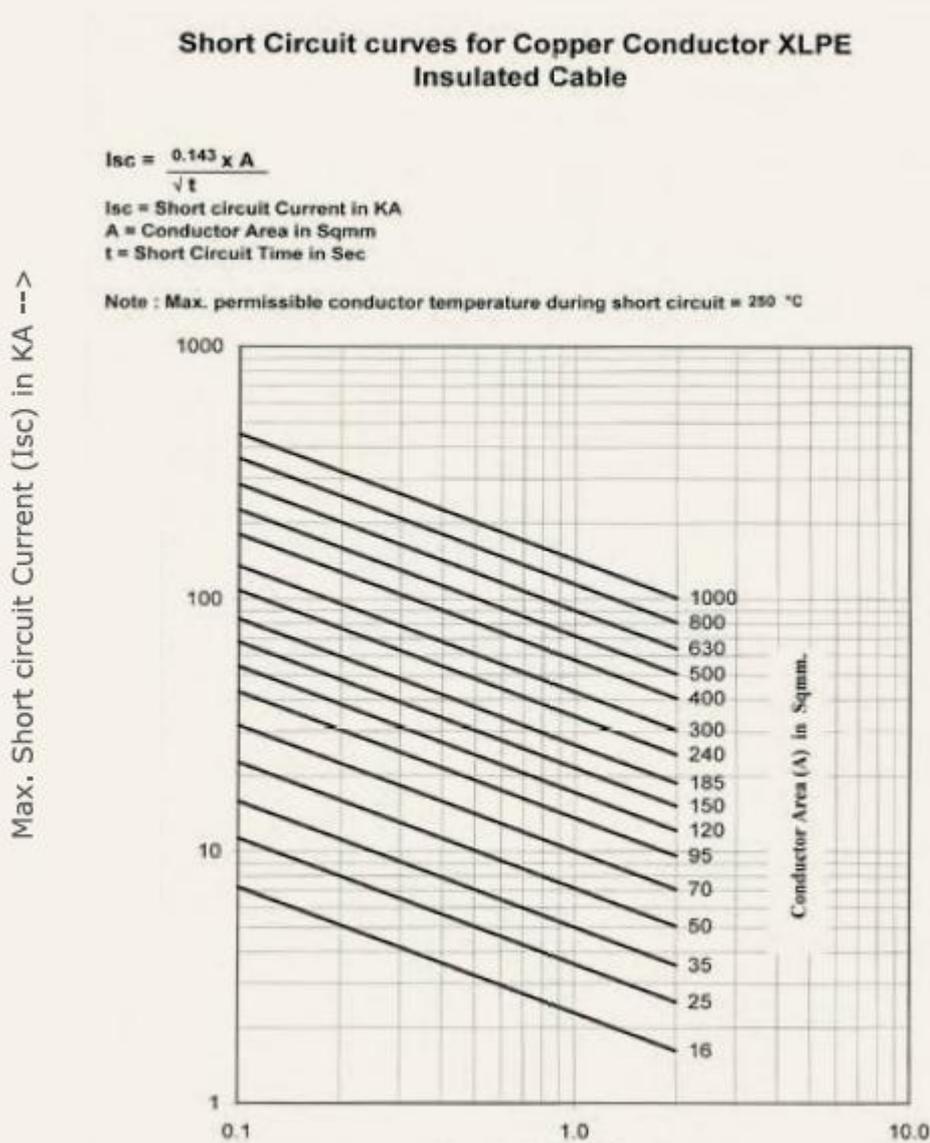

$$I_{sc} = 0.143 \frac{A}{\sqrt{t}}$$

I<sub>sc</sub> - Short Circuit Current in KA

A - Conductor Area in Sqmm

t – Short Circuit Time Sec.

Note: Max. Permissible conductor temperature during short circuit = 250°C

## Short Circuit for Aluminium Conductor XLPE Insulated Cable

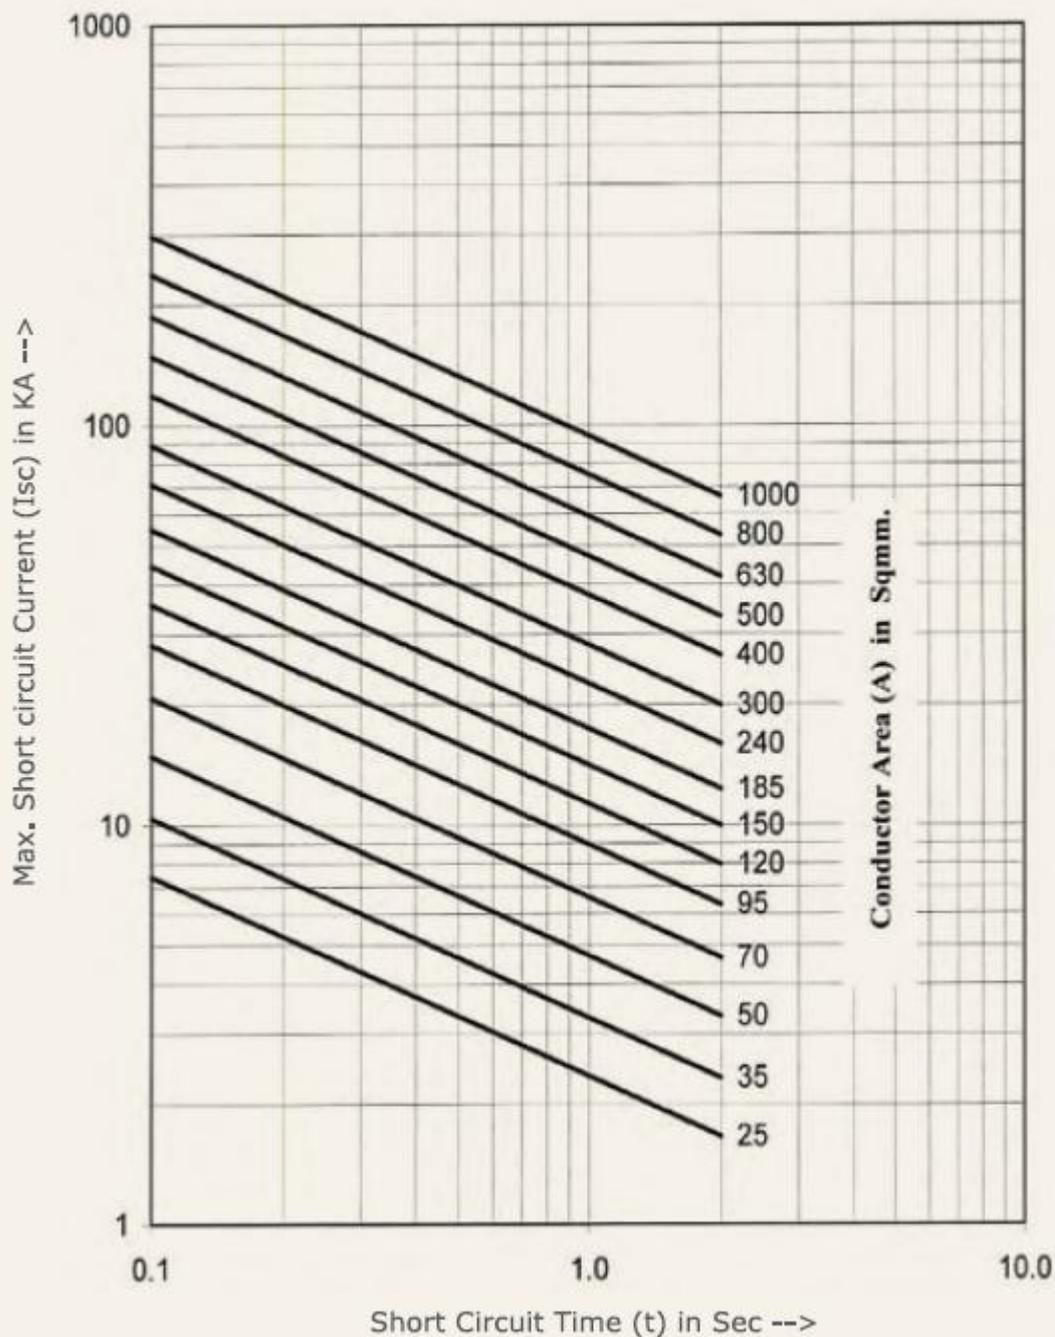

$$I_{sc} = 0.094 \frac{A}{\sqrt{t}}$$

$I_{sc}$  – Short Circuit Current in KA

A – Conductor Area in Sqmm

t – Short Circuit Time in Sec.

Note: Max. Permissible conductor temperature during short circuit = 250°C
